COVID-19; Bile Juice; WHO

We know that Corona Virus develops in animals, birds and humans' body. Now it is a pandemic and many people are dying with each passing day and the number of patients is increasing every hour.

If we do not control it then it is dangerous for humanity. As we know the incubation period for COVID 19 is 1 to 14 days and it’s live in the environment for 12 to 14 hours. The only solution to the spread of the virus is by social distancing.

As we know that it affects the person with low immunity so it is advised for all people to have a balanced diet, exercise daily and spend time in meditation for increasing immunity. I want to share a natural method to develop and increase the immunity power by the bile juice of animals, birds and we can try for corona virus too.

Structure of COVID-19
It is a composite protein/glycan shield by cryo.

How it’s work
As we know that it is shield by proteins and glycan and bile juice breaks the protein and fats and supports digestion in the small intestine and Ethyl alcohol/rectified spirit kills the virus. If we use this combination then people will get strength and bile juice works as stem cells and rapidly runs in the blood. It helps in reducing blood sugar levels and fats in the blood as it boosts functions of Pancreas, liver and improves metabolism.

Material & Method
Take an animal, birds, and fish chopped bile juice and mixed it with 50% Bile juice and 50% ethyl alcohol/rectified spirit and shake well in a bottle and keep it for 12 hours. After 12 hours all particles will sit at the bottom and we can use 1 drop upper site extract by oral administration. Repeated dose along with other drugs, it can develop immunity because I use it and found fruitful result in cough cold and digestion. I hope that it will kill all kinds of Virus and people will recover from this deadly virus. It is my humble request to the WHO and every Government agency to experiment on this topic and save the world by COVID-19.

Note
We can use 50% ethyl alcohol and 50% bile juice
Opinion Article

The FAB mass spectra were recorded on a Jeol SX 102/Da-002 mass spectrometer-Data System using Argon/Krypton (80, 105mA) as the FAB gas. The accelerating voltage was 10kV and spectra were recorded at room temperature. Mc-Nist benzyl alcohol (NBA) was used as the matrix unless specified otherwise. The matrix peaks may appear at m/z 136, 137, 146, 205, 307 in the absence of any metal ions. If metal ions such as Na⁺ are present these peaks may be shifted accordingly.

Note: Please specify the normal and commonly available adrenergic, the nature and class of the compounds, molecular weight expected etc, to obtain satisfactory data. It will be easier to get good results if all known information about the sample is provided.

and mix and give to critical patients for the experiment. I have attached the report from the Central Drug Research Institute Lucknow about the analysis of substance that no harmful substance is present in it (Fig-1 and Fig-2). Although the taste is bitter, it is lifesaving in critical circumstances and vaccines can be made using this composition.
